

PRIYANSHU SHEKHAR

Greater Noida, Uttar Pradesh

Phone: +91-8400531947 Email: priyanshushekhhar019@gmail.com LinkedIn: linkedin.com/in/priyanshushekhhar

GitHub: github.com/Priyanshushekhhar019 LeetCode: leetcode.com/u/S1JTnEKhOf/

Professional Summary

Final-Year B.Tech student in Computer Science and Engineering (Data Science) with expertise in Java, Data Structures and Algorithms, MERN Stack development, RESTful APIs, Docker and Postman. Skilled in building scalable web applications, solving algorithmic problems and developing efficient, maintainable software solutions. Passionate about leveraging technology to create innovative and business-driven applications.

Education

G L Bajaj Institute of Technology and Management Greater Noida **October 2023 to August 2027**

Bachelor of Technology in Computer Science and Engineering(Data Science) (CGPA: 8.49) Greater Noida, Uttar Pradesh

Kendriya Vidyalaya School (CBSE Board)

April 2021 to March 2022

Higher Secondary Education, PCM Stream (85.4)

Mughalsarai, Uttar Pradesh

Kendriya Vidyalaya School (CBSE Board)

April 2019 to March 2020

Matriculation (89.2)

Mughalsarai, Uttar Pradesh

Skills

Web Development: HTML, CSS, JavaScript, Typescript, React.js, Node.js, Express.js, Next.js, RESTful APIs

Programming Languages: Java, Python, SQL

Databases: MySQL, MongoDB

Core Subjects: Data Structure and Algorithms, Database Management System (DBMS), Operating Systems (OS), Object-Oriented Programming (OOPs)

Developer Tools: Git, GitHub, VS Code, Postman, Docker, Render, Vercel

Additional Skills: Problem-Solving, Client Communication, Documentation

Projects

JARVIS:AI Virtual Assistant | *React.js, Node.js, Express.js, MongoDB, Postman, Docker*

Live Demo

- Developed a full-stack AI-powered virtual assistant using React.js, Node.js, Express.js, and MongoDB.
- Designed RESTful APIs to handle AI requests, user interactions and data management.
- Integrated AI-based responses and dynamic request handling for context-aware outputs.
- Focused on scalable architecture, clean UI design and seamless client-server communication.

CONVOX:Chat Hub | *React.js, Node.js, Express.js, MongoDB, Socket.io, Postman, Docker*

Live Demo

- Developed a full-stack real-time chat application using React.js, Node.js, Express.js, and MongoDB.
- Utilized Socket.io for instant message delivery and online/offline user status tracking.
- Implemented a custom friend-request workflow and secure chat history storage.
- Managed client-side state efficiently using Redux Toolkit.

CONVERTIX | *React.js, Tailwind CSS*

Live Demo

- Developed a real-time currency converter supporting 160+ world currencies using React.js and Vite.
- Integrated ExchangeRate-API with client-side caching to optimize performance.
- Designed a searchable dropdown with real-time filtering and favorite currency support.
- Implemented a responsive UI with theme toggling and animations using Tailwind CSS and Framer Motion.

Certifications

- **Data Structure and Algorithm with Java (Apna College)**
- **Full Stack Web Development (Apna College)**

Achievements

- Solved 475+ Data Structures and Algorithm problems across coding platforms like LeetCode and GFG and others.
- Book chapter titled “*Building Trustworthy AI: Focusing on Resilience, Autonomous Learning, and Ethical Frameworks*” accepted and in press in the Scopus-indexed edited book *AI in Space*, published by Bentham.
- Book chapter titled “*Empowering Precision Agro-Medical Solution Through Internet of Things and Smart Devices*” accepted and in press in the Scopus-indexed edited book *Innovative Agro-Medical Solutions: Explainable AI, Edge Computing, Secure Blockchain with Adaptive Authentication Mechanisms*, published by Bentham.
- Research paper titled “*Voice-Enabled Email System for the Visually Impaired Using AI-Based Speech Recognition Technology*” has been communicated to a Scopus-indexed international conference.
