

PRIYANSHU SHEKHAR

Greater Noida, Uttar Pradesh

Phone: +91-8400531947 Email: priyanshushekhar019@gmail.com LinkedIn: linkedin.com/in/priyanshushekhar

GitHub: github.com/Priyanshushekhar019 LeetCode: leetcode.com/u/S1JTnEKhOf/

Professional Summary

Final-year B.Tech (CSE – Data Science) student with strong foundations in Data Structures & Algorithms, backend engineering and system design. Experienced in building scalable applications with Node.js, React.js, REST APIs, real-time systems, Docker and MongoDB, with hands-on expertise in AI/agentlic applications using LLM APIs, LangChain and LangGraph. Solved 500+ DSA problems in Java, with a strong problem-solving mindset and interest in building reliable, scalable AI and distributed systems.

Education

G L Bajaj Institute of Technology and Management Greater Noida **October 2023 to August 2027**
Bachelor of Technology in Computer Science and Engineering(Data Science) (CGPA: 8.49) Greater Noida, Uttar Pradesh

Kendriya Vidyalaya School (CBSE Board) **April 2021 to March 2022**
Higher Secondary Education, PCM Stream (85.4) Mughalsarai, Uttar Pradesh

Kendriya Vidyalaya School (CBSE Board) **April 2019 to March 2020**
Matriculation (89.2) Mughalsarai, Uttar Pradesh

Skills

Web Development: HTML, CSS, JavaScript, Typescript, React.js, Node.js, Express.js, Next.js, RESTful APIs

Programming Languages: Java, Python, SQL

AI/LLM: LangChain, LangGraph, Generative AI, LLM APIs

Databases: MySQL, MongoDB, Redis

Core Subjects: Data Structure and Algorithms, Database Management System (DBMS), Operating Systems (OS), Object-Oriented Programming (OOPs), Computer Networks(CN)

Developer Tools: Git, GitHub, VS Code, Postman, Docker, Kubernetes, Render, Vercel

Additional Skills: Problem-Solving, Client Communication, Documentation

Projects

CORTEXAI: Multi-Agent AI Platform | *React.js, Node.js, Express.js, MongoDB, LangChain, LangGraph, Redis, Docker*

- Built a full-stack multi-agent AI platform using microservices — Gateway, Auth, Chat, Agent, Billing services, with Redis for session auth, per-agent rate limiting and chat-memory caching.
- Designed a LangGraph agent router dispatching queries to specialized agents (chat, search, coding, PDF, PPT, vision) via Gemini/Groq LLMs.
- Built RAG-based document Q&A using LangChain (text splitting, embeddings) and Qdrant vector store, with MongoDB persisting files, chats and documents.
- Integrated Firebase auth and Razorpay billing with credit deduction; containerized services via Docker and CI/CD with GitHub Actions.

JARVIS: AI Virtual Assistant | *React.js, Node.js, Express.js, MongoDB, Postman*

- Developed a full-stack AI-powered virtual assistant using React.js, Node.js, Express.js and MongoDB.
- Designed RESTful APIs to handle AI requests, user interactions and data management.
- Integrated AI-based responses and dynamic request handling for context-aware outputs.
- Focused on scalable architecture, clean UI design and seamless client-server communication.

AURAMAIL | *React.js, Tailwind CSS, Vanilla Javascript, Node.js, Express.js, Postman, Docker*

- Built a voice-first React SPA using Web Speech API, ARIA live regions and keyboard navigation, enabling visually impaired users to manage email by voice.
- Built a Node.js/Express backend with Google OAuth 2.0, Gmail API and JWT authentication for email management.
- Implemented HTML sanitization, request validation, rate limiting and error handling for secure, reliable operations.

Certifications

- **Data Structure and Algorithm with Java (Apna College)**
- **Full Stack Web Development (Apna College)**
- **AWS Academy Graduate - Cloud Foundations - Training Badge(AWS Academy)**

Achievements

- Solved 500+ Data Structures and Algorithm problems across coding platforms like LeetCode, GFG and others.
- Book chapter titled “*Building Trustworthy AI: Focusing on Resilience, Autonomous Learning, and Ethical Frameworks*” accepted and in press in the Scopus-indexed edited book *AI in Space*, published by Bentham.
- Book chapter titled “*Empowering Precision Agro-Medical Solution Through Internet of Things and Smart Devices*” accepted and in press in the Scopus-indexed edited book *Innovative Agro-Medical Solutions: Explainable AI, Edge Computing, Secure Blockchain with Adaptive Authentication Mechanisms*, published by Bentham.
- Research paper titled “*Voice-Enabled Email System for the Visually Impaired Using AI-Based Speech Recognition Technology*” has been accepted to a Scopus-indexed international conference.
